Integritas

Consulting

Run a bigger business with the team you have.

Nicholas D. Fitton, Owner/President · Integritas Services LLC

The problem

Too much → on your plate

Pain 01

Owner time

Admin overload

Email, scheduling, paperwork and marketing all land on the owner.

Pain 02

Follow-up

Leads slip through

Calls, quotes and follow-ups get missed when no one has time to chase them.

Pain 03

Tool sprawl

Disconnected tools

Email, calendar, spreadsheets and apps that don't talk to each other.

What we do

We build → your system

We design and install the systems, process and AI tools that take admin, follow-ups, scheduling and marketing off your plate. Powered by Grok and the tools you already prefer.

- Systems
- Process
- AI tools

Built around how you work

Software & hardware

The apps, devices and website your team runs on, chosen and set up to fit how you work.

- Software
- Devices
- Website

AI & automations

AI assistants and automations for accounting, sales and admin, plus training for your team.

- Assistants
- Training
- Automations

The Stack

Any business → one Stack

Software, hardware, AI assistants, automations, your website and team training, brought together and built around how your business already works.

Covers

Accounting, sales and administration.

Illustrations, not client systems. Tools vary by business.

What it handles

Busywork → handled

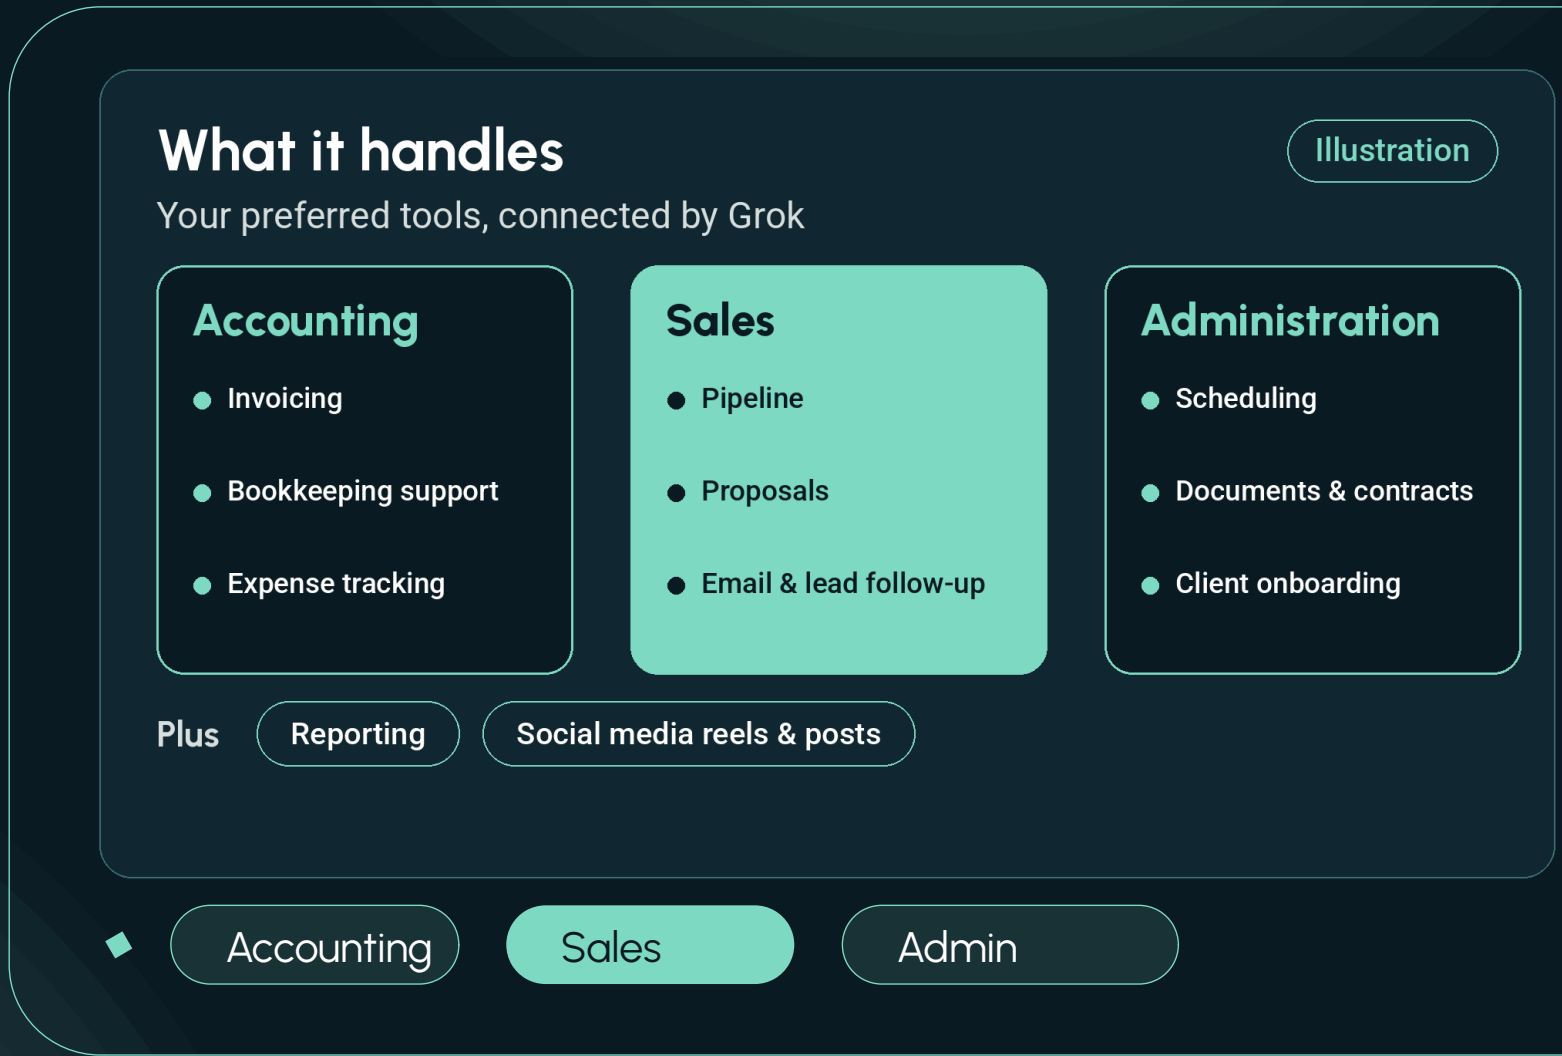

Accounting: invoicing, bookkeeping support, expense tracking.

Sales: pipeline, proposals, email and lead follow-up.

Administration: scheduling, documents and contracts, client onboarding.

Plus: reporting, and social media reels and posts.

Illustration, not a client system.

Process first Fix first → then automate

How we work

Illustration

01

Map it

How work flows today

02

Fix it

Cut rework and gaps

03

Automate it

Add AI on a sound process

Results stick because the workflow is fixed first.

Illustration of our approach.

Map it

See how the work flows today

Fix it

Remove rework and gaps

Automate it

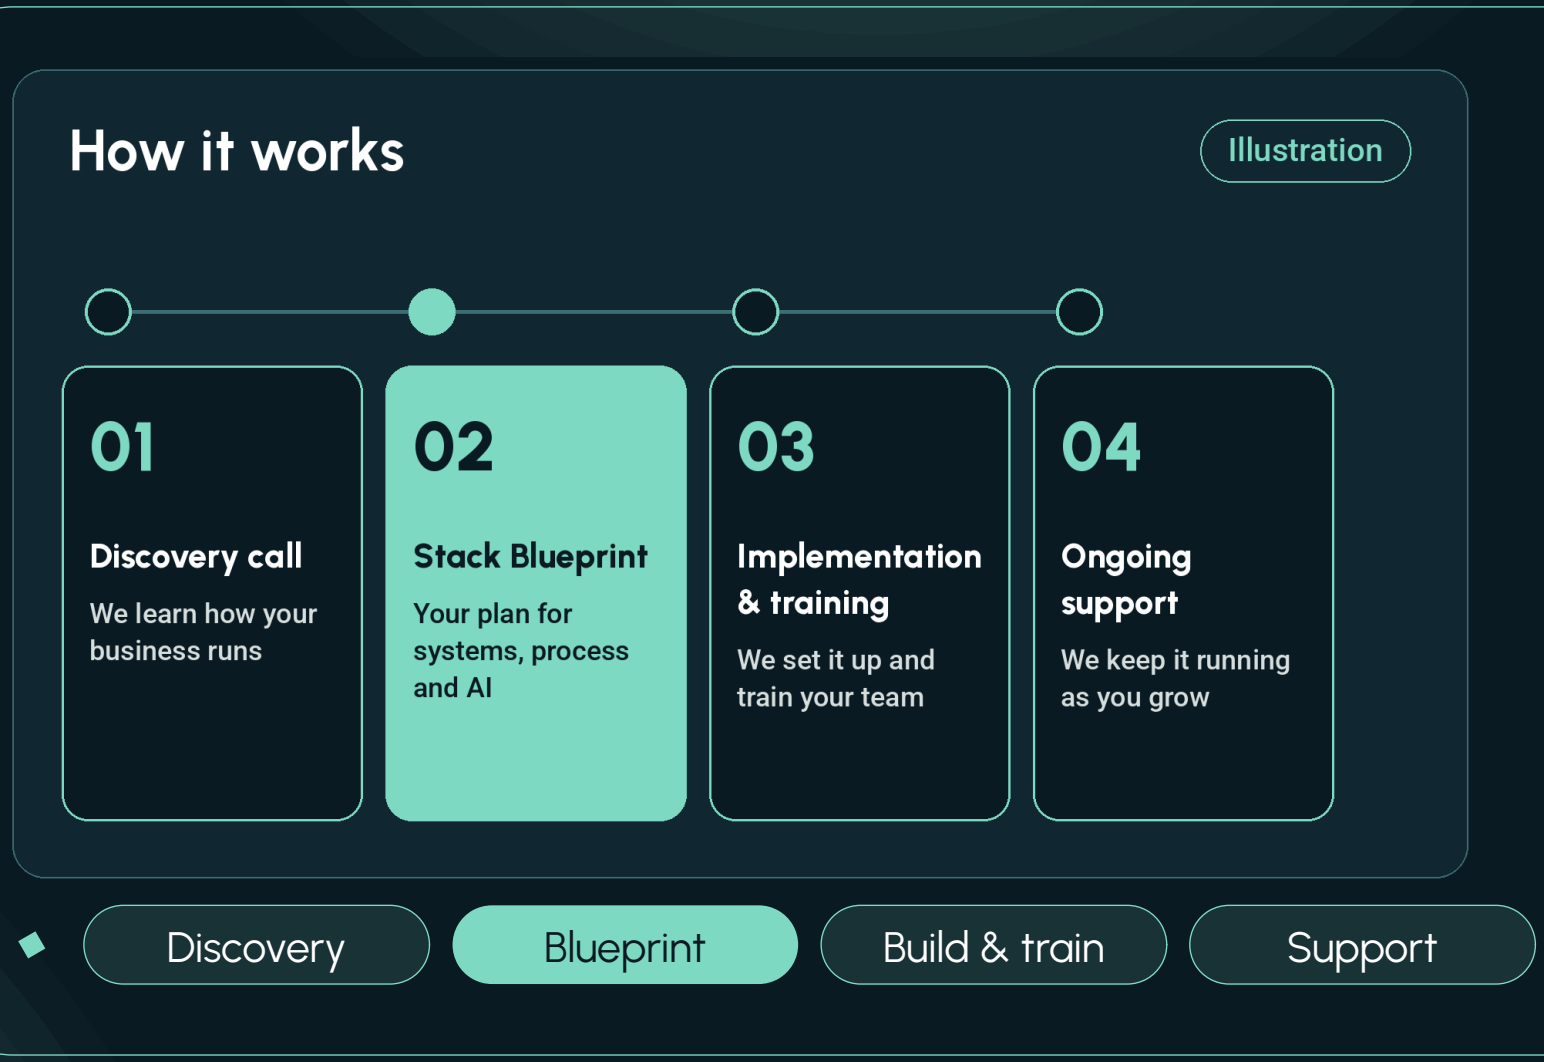

Then add AI so results stick

How it works

Four steps → one path

Discovery call, then your Stack Blueprint, then implementation and training with your team, then ongoing support.

Illustration of the process.

The Blueprint

Your plan → your way

integritasllc.com

The Stack Blueprint is your full plan: prompts, starting points, key questions and workflows.

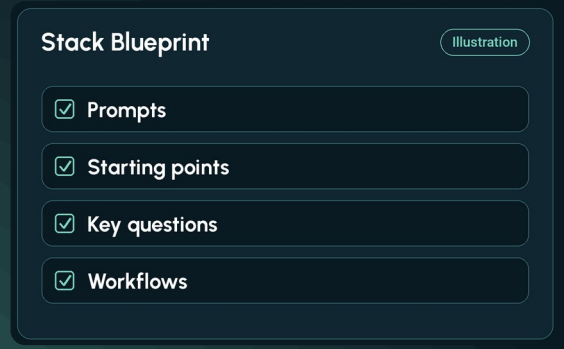

Illustration.

Do it yourself

Blueprint

Fully self-implementable for owners with the tech know-how. You get the prompts, starting points, key questions and workflows.

Implement with us

Done with you

Prefer a hand? We implement the Blueprint with you and train your team.

Next: book a discovery call.

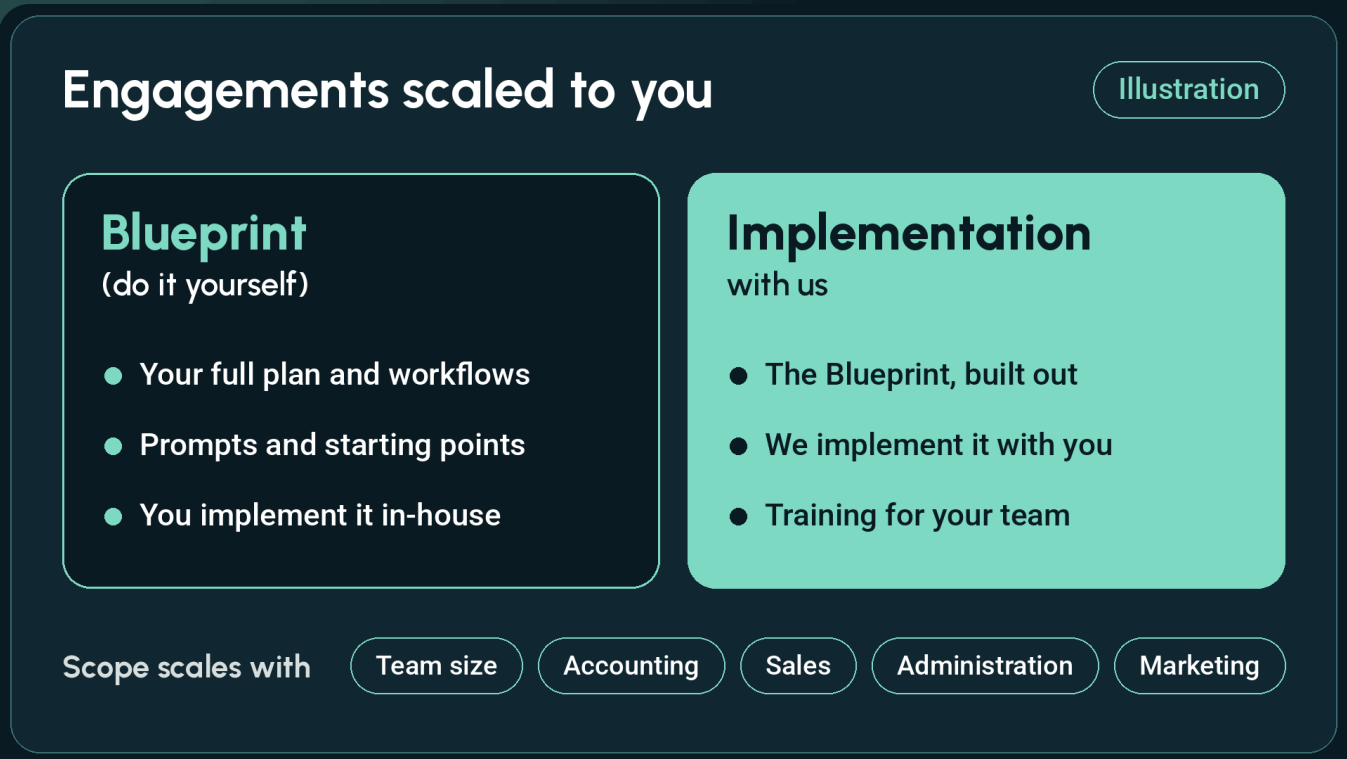

Illustration. Scope is set per engagement.

Engagements

Scaled to you.
→ Your scope.

Choose the Blueprint (do it yourself) or implementation with us. Scope scales with your team size and the functions covered: accounting, sales, administration and marketing.

Scope

Sized to your team

Start with one function, add more as you grow.

Who it's for

Small teams → ready to grow

Solo owners and small teams, up to about 10 people, in any industry. Buried in admin, follow-ups, accounting, sales and marketing busywork, and ready to grow without adding headcount.

Solo to ~10

people, any industry

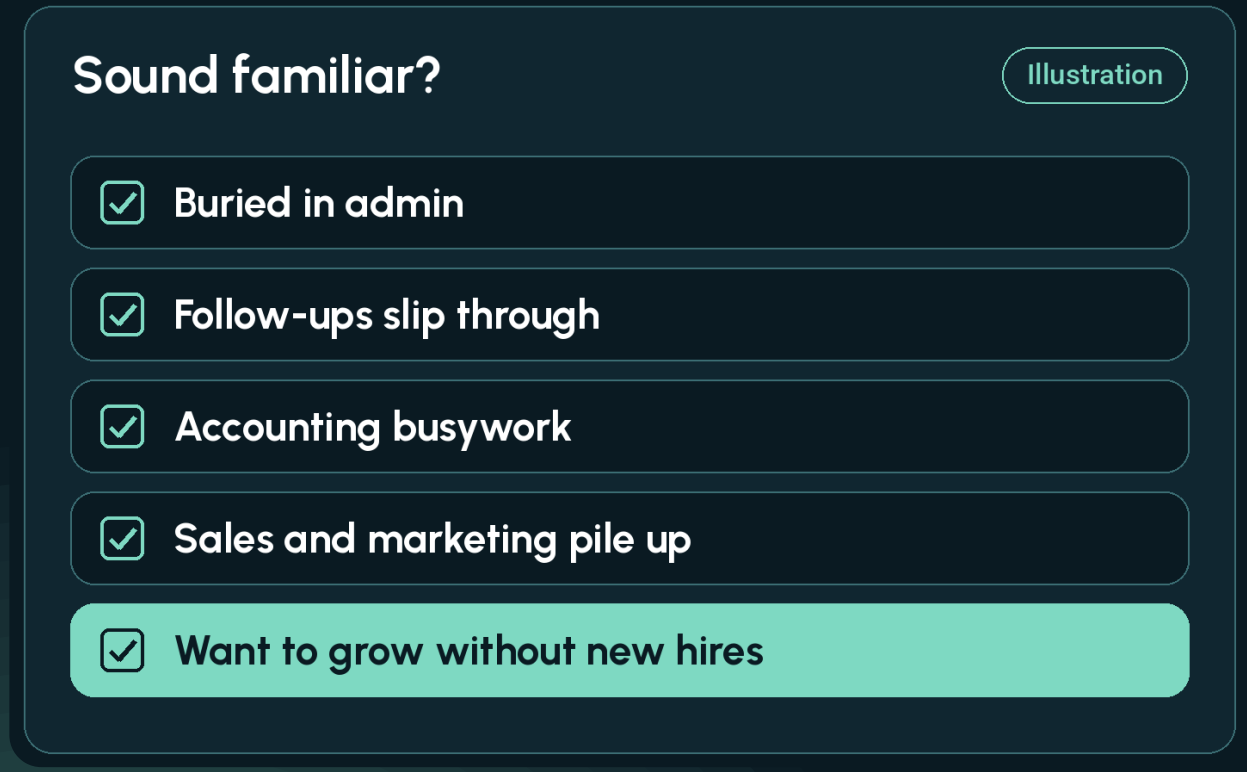

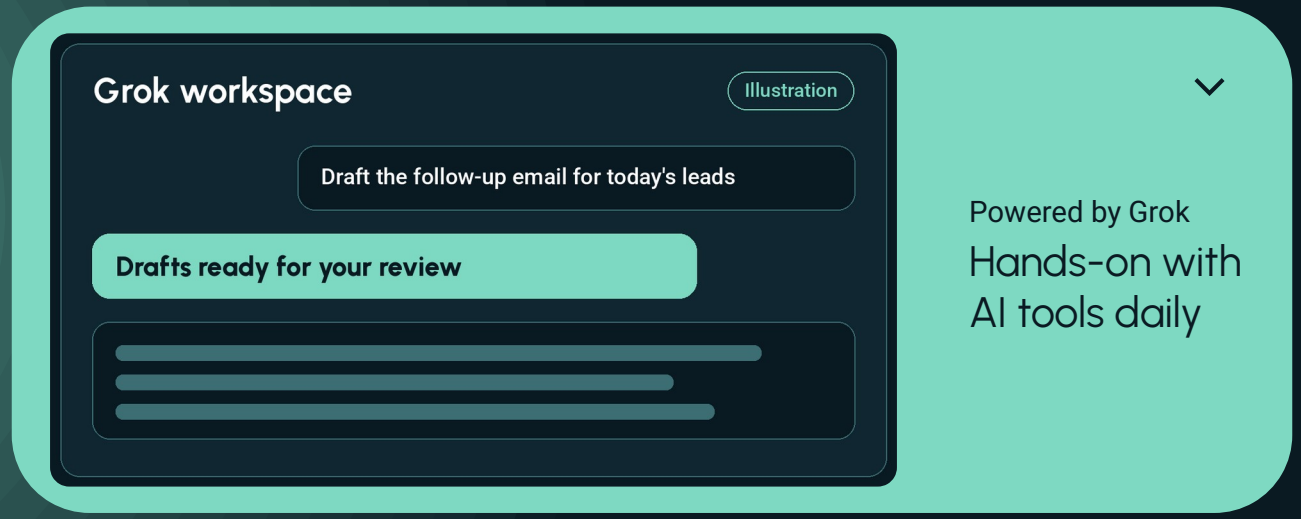

Illustration.
